Web Development Projects

Northway E-Commerce Website

2024 | Repo: github.com/gogulan12 | Live Site: Render Link

Northway: React.js E-commerce Platform with Firebase Authentication and Stripe Integration

- Leveraging Firebase authentication and Stripe checkout for secure transactions and user management
- Featuring dynamic search and filtering capabilities, empowering users to find products effortlessly
- Includes CRUD functionalities and admin controls for efficient product management

Realtor Website Clone

2024 | Repo: github.com/gogulan12 | Live Site: Netlify Link

Vite.JS project with Firebase authentication and Firestore data storage

- Developed a real-estate website with the functionality and design of a popular real estate platform (Realtor.ca)
- Implemented a dynamic listing feature allowing users to browse through properties with detailed information
- Users can create profiles to sell and rent properties and displayed property information using the Maps.io geocoding API

Jobi - Job Search Platform

2023 | Repo: github.com/gogulan12 | Live Site: Netlify Link

Functional React.JS project - To convert a design into a multi-page, functional, responsive website

- Developed a job search platform using React.JS, allowing users to search and apply for jobs from a variety of companies with search functionality.
- Utilized React Router to implement client-side routing for seamless transition between pages. Also used Firebase Firestore to store, add, and delete job posting information.

Administrative Work Experience

T-REX Consulting (Contract)   **Toronto, ON**
Office Administrator   *March 2024 - April 2024*

- Organized and conducted summer Co-op interviews for both US and Canadian offices, coordinating with HR teams
- Performed thorough research to support managers with daily assignments, providing actionable insights
- Managed interview schedules and communication, showcasing strong organizational skills
- Developed engaging presentations and course materials for upcoming training courses, aligning content with company objectives and training needs.

Morneau Shepell   **Toronto, ON**
Client Care Representative / Data Entry Clerk   *September 2019 - June 2020*

- Responded to inquiries from Nortel plan members regarding their pension plan including additional entitlements, early retirement plan options, form completion assistance, and updates to personal information
- Followed up with member information changes and document requests using the company's case management system
- Assisted with tracking Sears and Nortel plan member documents for further review and member inquiries
- Reviewed and recorded data verification statements for former Sears's employees to update client database using Excel
- Oversaw Sears asset roll forward by recording several expenses using the monthly statement of changes in net assets
- Responsible for the reconciliation of monthly payments using Excel functions such as VLOOKUP, MATCH, and INDEX to match payments distributed by CIBC Mellon as the custodian to ensure accuracy of disbursements
